M A R C H Opening date approaches

March 29 will be the first race day at Concept Haulers Motor Speedway. For those of you planning on attending let us know as much in advance as possible your needs for MoJo tires, Motul Oil. fuel, and MG tires. The official tire Concept Haulers Motor Speedway is MG except for Rotax classes will use the official MoJo tire. The spec fuel is Sunoco and for Rotax the Sunoco fuel is an equivalent to VP MS 93. The spec oil for Rotax is the official Motul oil. We have a good stock of everything but as always opening day carries uncertainty about how much is enough. While this is an official points race the first official Rotax Challenge race will be the following Saturday April 5.

LSR on Bendix Hours

With the opening of the season store hours will be changed. On Saturdays we will be at the track. We will start staying open later in the evenings during the week and some weekday hours will change due to travel requirements. We will keep the hours of the store up to date on the website www.lsrmotorsports.com or call me at 574-289-3040 (office) 574-532-6180 (cell).

Trackside Support

Always one of our main emphasis. This year we will be splitting our team on many race weekends. You will find Stacey and Marshall at Concept Haulers Motor Speedway. We will have full support with the parts truck. Al and Eric will attend some race weekends at South Bend, but only be able to provide technical support. All parts, tires and fuel must be purchased from the local pro shop on race weekends. If you need something prior to the weekend we can still make these available to you.

Mini Max Chassis

The new CRG Mini Max chassis is now available. We have asked CRG to add 4mm to the length of the successful 101 Mini Max chassis. For those running both Rotax and WKA classes you can use the same chassis. This will also be available with either a 30mm or 40mm axle.

Mini Max legal bumpers will be available as an option.

New DVD

We now have the Extreme Racing DVD in stock. Cost is \$25.00. If want something to show your friends what racing is about, this is the one. We have more stock of both the Rotax How TO; and the Science of Driving DVDs coming. These continue to be good sellers.
