

## NEW ROTAX INTAKE SILENCER AVAILABLE NOW!

Due to change of supplier intake silencer with ROTAX part numbers: 225010 intake silencer case bottom, 225026 intake silencer case top are being replaced by a new designed and improved intake silencer. The ROTAX part numbers for the new intake silencer and corresponding parts is as follow:

- 225015 intake silencer case bottom
- 225025 intake silencer case top
- 225051 filter element
- 251720 support bracket
- 4 x 242141 nut M6

### **The new intake silencer features the following technical changes:**

- New improved and more pleasing design.
- Due to the new design of new intake silencer the air flow to the radiator is less interfered, therefore engine cooling is improved.
- New intake silencer interferes less with drivers seat.
- Designed draining system for operation under wet condition.
- Easy assembly of bottom and top case by means of fixed nuts on intake case bottom.
- Intake manifold shows no more in the direction of the rear tires, is less influence of water spray from the rear tire.

For the new intake silencer it is necessary to use the new support bracket 251720, filter element 225050 will be replaced by new filter element 225051 (new supplier). The new holder for filter element 225060 will stay unchanged.

All 125 MAX, 125 Junior MAX engines will be equipped with new intake silencer presumably beginning in 2007.
